- creative problem solving
- understanding today's technology

and she appreciates and listens to the needs of:

- seniors
- youth
- young families
- business owners
- homeowners
- the community at large

Will you help protect and preserve our community?

If you could design the perfect representative for Sierra Madre City Council, wouldn't it be a person who has proven business and financial expertise, an understanding of careful and judicious management of your tax dollars, solid roots in the community and the willingness to listen to your concerns and suggestions? These qualities are rare but they do exist in one candidate:

MaryAnn MacGillivray

**The future is in your hands and the decision is your on election day,
Vote Tuesday, April 8, 2008**

Thirty-six years ago, MaryAnn and her husband, Duncan, established their roots in Sierra Madre. Raising four children here involved them in a number of programs including Little League, girls softball, soccer, swim team, and years of participation at Sierra Madre Community School where MaryAnn served on the Board of Trustees.

Since 1979 MaryAnn MacGillivray has been a successful businesswoman with the establishment of two bio-medical corporations which have served a number of Fortune 500 companies in the area of product development and new medical equipment. She has a BS degree in bio/chemistry, as well as an MBA, and is currently managing the Chemistry Lab at Methodist Hospital in Arcadia. Her proven business know-how and experience have given her the combination of qualities to translate the technology of today into effective and protective policy.

MaryAnn was mayor of Sierra Madre from 1994-1995 and served two terms on the City Council. Her record as an elected official speaks to her dedication to **protect and preserve the character and quality of life of our foothill village**. She served as council liaison to the first Hillside Management Task Force, the product of which was an unprecedented ordinance designed to manage development without damaging our hillsides or the viewscape they provide to the rest of the community. In 2007 she served on the second Hillside Management Task Force to make sure that the intent of the ordinance would continue to protect our city.

During her term as mayor MaryAnn appointed several citizen ad hoc committees to create documents that would meet legal mandates and be used as road maps to define and operate our community:

- the **General Plan**: still current
- the **Youth Master Plan**: still current
- the **Economic Development Council**: provided financial direction

MaryAnn is fiscally responsible. During her tenure on the council, audit reports were completed according to a schedule, questions were addressed and the city had a comfortable financial reserve.

MaryAnn respects the knowledge and intelligence of the citizens of Sierra Madre and appreciates their spirit of volunteerism. She believes that we should look to ourselves to resolve the challenging issues we face now and in the future...

"Together, we have what it takes!"
